

Projects/Fall 2011

Project topics..

1. *Authentication and Authorization* (Alexander Arend +Nicole Conniff), (Nicole Conniff +004)
2. *Biometrics* 79, (Alyssa Blank+Andres Acuna), Holley Knight, (103+842+829), Ashley Budzinski
3. *Cryptographic tools* (007+ Michael Leighton), Gregory Milner
4. *Computer Forensics* 316, 391, 225, Kristina Wong, Charles Pudwill, Beshoy Iskander, Matthew Berk
5. *Cookies* 504, Angelo Fajardo, James Brannin, Dustin Burt, Daniel Knox, Juan Londono
6. *Cybersecurity* Kevin Hall, Michael R. Poteat, Maurice F Derius,
7. *Data Recovery Techniques* Brittany Pitcher, Michael Dunton
8. *Database security* 314
9. *File System Security* Jake Ettelson
10. *Firewalls* Arash Afshar, Scott Boland, Nicklaus Cormier
11. *Intrusion Detection Systems* Justin Smith
12. *Java security* Christiann Bacud, 628
13. *Kerberos* 842
14. *Logic Bombs* (Mercier, Nichole+027), Dean Burgos, 504, 001
15. *Mobile security (IPv6, and similar)* Josh Decker, Troix Douglas, 657
16. *Physical Security* Miguel Cheung, 812, Kevin Daniels
17. *Risk and threat analysis* (Megan Stanforth + Russell Stephenson)
18. *Security issues in Criminology* (Candace Childress+Amy Shewmaker), Joe Sweat, 851, Dan Kowalski
19. *Security models* (118+133)
20. *Smart Cards* Matt Share, David Kapalko
21. *Social networking (security issues)* 606, 445, (Joseph Bartholomew+Leonard Cortelli+Toy Benett)
22. *Software security* Corey Owens, 627
23. *Buffer overflow* Joshua Lemke, Eric Daniels
24. *Spoofing attacks* Ashley Bengston, 002, 300, Alexander Akerstrom, Kurt Gurbuz
25. *Steganography* 496,Thomas Clayton, Stuart Gordon
26. *Social Engineering* 404, 129
27. *SSL/TLS* Christopher Burt,
28. *Trusted Computing*
29. *Trojan Horses on Web* Lindsey Barlett, Je Hong Yoo *
30. *Unix security* Nicolas Cabrera, Jaxon Lear, Jason Turner
31. *Viruses* Andrew Cruz, (Tiffani Brown + Shayla Jackson), 253, Manuel Alvarado, Bryan Franklin, Robert Grimsley
32. *Web Spoofing* 831, Erik Greene, Kelsey Voellek
33. *Wireless Network Security* Adrian Dupree, 539, Michael Turner, Michael S. Kerr, Dontavius Barney
34. *Session Hijacking* (Justin Roney + Daniel Porrello)
35. *Computer Forensics* 932
36. *Adversary tracking* (Eric Daniel, Stuart Gordon)
37. *Layers of security: protecting classified information* (Jack Howell+685)
38. *OS/Platform Security* Richard Boudreaux, Jean Virgille
40. *Popular hacking methods* William Bassett
41. *Virtual Machines* Scott Deese
